JBoss Choose Your Own Adventure – JBoss BPM Suite Lab : Lab Guide

Information	
Technology/Product	Red Hat JBoss BPM Suite 6.1 & Red Hat JBoss EAP 6.4
Difficulty	3
Time	1-2 hrs
Prerequisites	Basic Java knowledge, ability to read English instructions.

Workshop given at Red Hat Summit 2015 as part of the Choose Your Own Adventure middleware showcase.

In this lab, you will:

- Create a project containing a BPM process to handle HR Employee rewards.

- Create user tasks and forms to support them.

- Learn and implement several advanced BPMN design features.

BEFORE YOU BEGIN...

You should be logged into the workstation and locate the root project directory for this lab:

- **summit-choose-own-adventure-bpms**
- all instructions can be found within the project directory

LAB INSTRUCTIONS

We will be completing a JBoss BPM HR Employee Rewards project from scratch, using modern BPM tooling to create:

- Domain model.
- BPM Rewards process
- User task forms
- Run solution when finished.

Get started:

1. $ cd [project-root-directory]/summit-choose-own-adventure-bpms/bpms-install-demo

2. $ ./init.sh

3. Wait while the entire project installs.

4. Start following lab instructions at [project-root-directory]/summit-choose-own-adventure-bpms/*bpms-labs/index.html* (open in a browser)

5. When labs have been completed you will be walked through how you can run the JBoss BPM Rewards project to verify your work.
