redhat

JBoss Choose Your Own Adventure – JBoss BPM Suite : Workshop Guide

Information	
Technology/Product	Red Hat JBoss BPM Suite 6.1 & Red Hat JBoss EAP 6.4
Difficulty	3
Time	4 - 8 hrs
Prerequisites	Basic Java knowledge, ability to read English instructions.

Workshop originally given at Red Hat Summit as part of the Choose Your Own Adventure middleware showcase.

In **this workshop, you will:**

- Create a project containing a BPM process to handle HR Employee rewards.

- Create user tasks and forms to support them.

- Learn and implement several advanced BPMN design features.

BEFORE YOU BEGIN...

You should have downloaded and unzipped worksho or have been given the workshop to install. Start in the root project directory for this workshop:

- *summit-choose-own-adventure-bpms-master*
- all instructions can be found within the project directory

WORKSHOP INSTRUCTIONS

We will be completing a JBoss BPM HR Employee Rewards project from scratch, using modern BPM tooling to create:

- Domain model.
- BPM Rewards process
- User task forms
- Run solution when finished.

Get started:

1. $ cd summit-choose-own-adventure-bpms-master/bpms-install-demo

2. $ ./init.sh

3. Wait while the entire project installs.

4. Start following workshop instructions at summit-choose-own-adventure-bpms-master/*bpms-labs/index.html* (open in a browser)

5. When labs have been completed you will be walked through how you can run the JBoss BPM Rewards project to verify your work.
